## H1 ICE HOOD

A 2mm One Size Fits All stretchy "ice-hood" that covers all exposed skin. Holes for mask and breathing device can be trimmed to perfection by the user. Also provides excellent protection against Jellyfish in infested waters.

Sizes: One-size  
Art nr 189099

## PRODUCT SUMMARY

The body reacts to cold and heat by adjusting the blood stream to different parts of the body, like hands, fingers and feet. But the body can not adjust the blood stream to your head. This to ensure the brains function during all conditions. That is why the colder it gets, the more heat you loose from the head by radiation, or even worse, by conduction in the water. You keep warmer with an effective hood.

Waterproof H1 HOODS including the unique HAVS (Hood Air Venting System) is constructed with these scientific facts in mind. That is what we call Facing Reality.
